EXECUTIVE SUMMARY

Computer Science (Cloud Computing) student with hands-on experience in AWS and certifications including AWS Cloud Practitioner and Azure Fundamentals. Skilled in cloud infrastructure, DevOps tools, and Python, seeking opportunities to apply and expand technical expertise in cloud and modern infrastructure technologies.

EDUCATIONAL QUALIFICATION

D Y Patil International University, Akurdi Aug 2022 - May 2026
B.Tech Computer Science and Engineering- Cloud Computing

EXPERIENCE

Cloud intern : Elite tech May 2025-Aug 2025

- Configured AWS S3, CloudWatch, and SNS alerts for scalable storage, monitoring, & automated notifications.
- Implemented IAM security policies and S3 encryption to enforce least-privilege access & secure data management.

Web Development Intern : GMMSP, Pune May 2024-Aug 2024

- Contributed frontend interfaces using HTML, CSS, JavaScript, improving user experience by 30%.
- Managed backend integration via MySQL, enabling smoother data retrieval operations.

PROJECTS

Enterprise-Ready AWS Architecture — Private S3 Access & VPC Peering

- Architected isolated VPCs with peering to enable secure private communication without internet exposure
- Configured S3 Gateway Endpoints to eliminate public access, reducing attack surface and improving security
- Enabled centralized logging using VPC Flow Logs and CloudWatch

AWS RDS MySQL — Multi-Connection Endpoint Configuration

- Deployed MySQL RDS with secure endpoint configuration and custom parameter groups
- Established remote database access using MySQL Workbench with security group rules
- Implemented automated backups and CloudWatch monitoring

Retrieval-Augmented Generation (RAG) Chatbot — Amazon Bedrock

- Developed a RAG-based chatbot using Amazon Bedrock, LangChain, and FAISS
- Built a Streamlit interface for real-time PDF querying and domain-specific knowledge retrieval
- Integrated semantic search using vector embeddings

ChronoLog Compute- Autonomous NLP based Cloud log Analysis

- Developed an AI-powered cloud log monitoring system for anomaly detection and predictive analysis
- Integrated AWS CloudWatch, ML models, and NLP techniques for log analysis and alert generation
- Built a dashboard for real-time monitoring and visualization of cloud infrastructure performance

SKILLS

• Cloud Platforms: AWS, Microsoft Azure	• DevOps: Linux, Docker, Kubernetes, CI/CD
• Databases: MySQL, PostgreSQL	• Core Competencies: Computer Networks, DBMS
• Frameworks/Tools: Git/GitHub	• Languages: Python

CERTIFICATIONS

• AWS Certified Cloud Practitioner (CLF-C02)	• AWS Generative AI and AI Agents with Bedrock (Coursera)
• Microsoft Azure Fundamentals (AZ-900)	• SQL Certification (HackerRank, Udemy)
• AWS re/Start Graduate	• Developing Soft Skills and Personality - NPTEL

POSITION OF RESPONSIBILITY

- Student Ambassador – Office of International Affairs (2025 – 2026):
Represent the university and coordinate international cultural and academic programs
- Event Lead – Clydex Cloud Computing Club (2024 – 2025):
Organized cloud-focused workshops and managed logistics and industry collaborations
- Content Writing Lead – Under25 DYPIU (2023 – 2024):
Led content strategy and designed event creatives using Canva to increase student engagement
